CNC PRECISION MACHINING IN SERIES PRODUCTION - MILLING AND TURNING SOLUTIONS

SISMA is a contract manufacturer of parts and components by the provision of CNC machining services to the medical, aerospace, optical and mechanical industries. We are skilled in precision machining of a wide range of materials (steel, stainless steel, brass, titanium, aluminum and non-metallic materials) for more than 30 years. SISMA’s history has been driven by a series of technological innovations which have brought competitiveness in a broad spectrum of markets due to a permanent investment in the latest technologies and expertise of our team. Over 30 years of skilled engineers and experienced operators focused on customer satisfaction together with a permanent investment on the forefront technology lead to long-lasting partnerships in a wide variety of industrial areas. We are able to perform the most complex parts in a short notice. We stake on strict quality, quick responsiveness and we are always pursuing processes optimization in order to achieve continuously performance improvements. All products are manufactured in compliance with the requirements of ISO 9001, ISO 13485 and ISO 14001 quality and environmental standards. EN 9100 is in implementation phase.
